

HSE MANAGER, H2 Energy Esbjerg

We are looking for an experienced HSE Manager to join our growing team in Esbjerg, Denmark.

H2 Energy Europe plans the world's biggest Hydrogen Production Plant in Esbjerg. With a capacity of 1 GW, the plant will convert green electricity into hydrogen, which can be used directly in trucks (an annual fuel consumption of more than 10,000 trucks, more than 1/3 of all trucks in Denmark) and other heavy land-based transport.

About the role

In this role you'll become part of the project team set for delivering the 1 GW project in Esbjerg – taking the project through its next major phases of Engineering, Construction and Commissioning. You'll be responsible for the full aspect of the HSE disciplines, including implementing procedures, tools, and workflows to ensure the highest possible level of health safety and environmental control.

You'll be working closely with the whole project team to secure a successful project delivery. Furthermore, you'll be leading and work closely with the authorities in relation to the safety and environmental permitting process.

Responsibilities

- Lead and handle the authority permitting process related to environment and safety
- Liaising with relevant authorities
- Manage all HSE reporting and set up the full HSE training program
- Take active part in public meetings to address any HSE related topics
- Further develop the safety concept of the plant; ensure that safety is optimally included in the plant design
- Ensure that all relevant requirements for safety and environment is followed and included in all aspects of the project (incl. construction, commissioning, startup and into operations)
- Keeping up to date and ensuring compliance with current health and safety legislation
- Review contractors' safety competences, qualifications and documents, as part of selection process
- Establish site safety plans before commencement of site works. This is in close collaborations with local organizations, contractors and authorities
- When construction work starts, actively ensure that site safety is kept at its highest level
- Ensuring that all equipment installations is done safely
- Undertaking risk assessments and identifying potential hazards

Desired skills

- Proven experience as HSE Manager or similar roles for infrastructure projects

- Experienced in working with safety and environment related to authorities and permitting
- Experienced in authorities collaboration
- Strong leadership and organizational skills
- Familiar with safety and environmental requirements related to construction, commissioning, and operations of large industrial plants
- Excellent communication and people skills
- Fluent in Danish and English

Why H2 Energy?

H2 Energy is a growth company in the energy sector and a pioneer in the use of hydrogen. Together with our partners and customers, we are developing the global hydrogen markets with large scale projects in various, economically viable applications. We are creating the whole ecosystem to connect producers and consumers in a sustainable economic environment.

What we offer

- Highly skilled and enthusiastic project team, working towards a mission for sustainability, and be part of a new business era of Power-to-X
- Learning, development, and career opportunities of a growth company
- Supportive and low-hierarchy team

Next steps
