

Project Controls Manager, H2 Energy Esbjerg

We are looking for a Project Controls Manager to join our growing team in Esbjerg, Denmark.

H2 Energy Europe plans the world's biggest Hydrogen Production Plant in Esbjerg. With a capacity of 1 GW, the plant will convert green electricity into hydrogen, which can be used directly in trucks (an annual fuel consumption of more than 10,000 trucks, more than 1/3 of all trucks in Denmark) and other heavy land-based transport.

About the role

In this role you'll become part of the project team set for delivering the 1 GW project in Esbjerg – taking the project through its next major phases of Engineering, Construction and Commissioning. The role includes the full aspect of project controlling for this major infrastructure project. You'll be responsible for implementing tools and workflows to optimally control the project progress and financial management throughout all project phases. In this role, you will be working closely with the whole project team to secure a successful project delivery.

Responsibilities

- Cost management, scheduling, project resources, progress reports, forecasting, and risk management
- Compiling and/or reviewing capital and operational cost estimates
- Ensuring projects are correctly setup in terms of control plans and baselines
- Managing all project reporting activities
- Ensure cash flow is appropriate for the project
- Conducting analysis of variances and calculate its financial impacts and actively trouble shooting to identify deviations in the plan
- Future performance is appropriately forecast to completion
- Maintaining Opportunity and Risks and Actions register
- Maintaining consistent project cost model and integrated schedule – budget, actual, and forecast
- Managing change of scope process and impacts on project controls
- Organizing and managing the Doc Control process
- Setting-up and managing project-specific management systems with focus on project controls

Desired skills

- Proven experience as Project Controller for infrastructure projects or similar role
- Discipline knowledge of Scope, Cost, Schedule, Risk and Contract Management and interrelation.
- Sufficient understanding of corporate financial reporting and constraints for effective interface

- Able to critically evaluate information, generate solutions and actively using facts combining analytical thinking and experience to support decisions
- Excellent knowledge of data analysis and forecasting methods
- Proficient with MS office and other financial management software
- Strong leadership and organizational skills
- Excellent communication and people skills

Why H2 Energy?

H2 Energy is a growth company in the energy sector and a pioneer in the use of hydrogen. Together with our partners and customers, we are developing the global hydrogen markets with large scale projects in various, economically viable applications. We are creating the whole ecosystem to connect producers and consumers in a sustainable economic environment.

What we offer

- Highly skilled and enthusiastic project team, working towards a mission for sustainability, and be part of a new business era of Power-to-X
- Learning, development, and career opportunities of a growth company
- Supportive and low-hierarchy team

Next steps

Please submit your application and CV to [Jenny Räsänen](#). If your profile is a match, we will invite you for a first chat to discuss the role and your expectations in more detail.

At H2 Energy we commit to an inclusive recruitment process and equality of opportunity for all job applicants.
